

Javeline PlatForm

User Interface Development

Ruben Daniels

Lead Developer Javeline PlatForm

De User Interface

- Veld van ontwerpers
- Waar de klant het meeste om geeft
- Veel wijzigingen tijdens het project
- Veel overeenkomsten in elk project

Javeline PlatForm

- Prototyping
- Scheiding van domeinen
- Wijzigingen
- Reuse

SmartBindings

- Bind data aan je UI
 - `<j:bindings />`
- Communiceer wijzigingen aan de server
 - `<j:actions />`
- Overige elementen
 - `<j:dragdrop />`
 - `<j:contextmenu />`
 - `<j:actiontracker />`
 - `<j:model />`

Bindings

```
<j:list>
```

```
  <j:bindings>
```

```
    <j:caption select="@name" />
```

```
    <j:traverse select="person" />
```

```
  </j:bindings>
```

```
  <j:model>
```

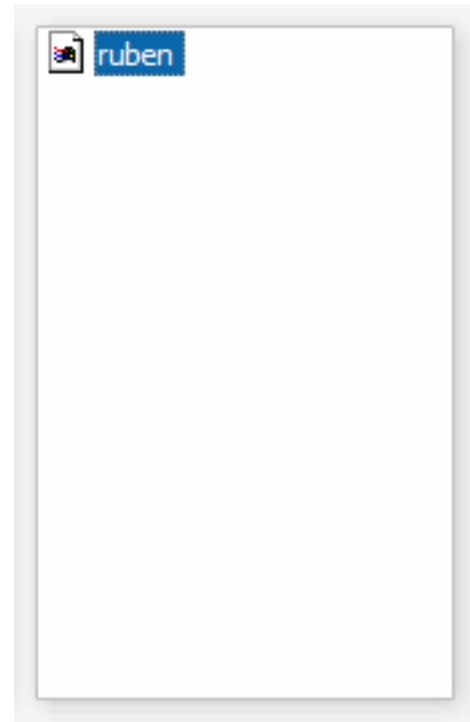

```
    <persons>
```

```
      <person id="10" name="ruben" />
```

```
    </persons>
```

```
  </j:model>
```

```
</j:list>
```

Actions

```
<j:actions>
```

```
  <j:rename set="rpc:comm.rename(xpath:@id, xpath:@name)" />
```

```
</j:actions>
```

Teleport:

```
<j:teleport>
```

```
  <j:rpc id="comm" url="http://example.com/rename.php">
```

```
    <j:method name="rename" />
```

```
  </j:rpc>
```

```
</j:teleport>
```

Gotta get me some of that
